

AUTOM8ION LAB

Veteran-owned engineering firm building custom AI, automation, and software for compliance-driven industries. Engineered to commercial speed, documented to federal standards.

SDVOSB Pending · SBA Certification Pending · VA Vets First Pending

ENTITY PROFILE

Legal name	Sitehues Media Inc. DBA Autom8ion Lab
Business type	Veteran-Owned Small Business · SDVOSB Pending
UEI	YY2DR3KSENH7
CAGE	9YCS7
DUNS	05-289-2750
SAM.gov	Active
Headquarters	Plant City, Florida, USA
Operations	Montreal, QC, Canada
Delivery	United States and Canada
Founder	Sean Richard

CORE COMPETENCIES

AI Agent Development. Agents that execute multi-step work inside your environment, under your access model, with every action logged.

Custom LLM Systems. Private deployments — on-premises, private cloud, GCC High or GovCloud — where documents, prompts and outputs stay inside your control boundary.

Workflow Automation. Custom n8n and Python orchestration with approvals, role-based access, audit logging and event traceability.

API Integrations. Integration layers for regulated systems, including those with no public API. Encrypted paths, logged transfers, enforced data boundaries.

Cybersecurity & Compliance Engineering. CMMC 2.0, NIST 800-171, HIPAA and SOC 2 controls implemented with the evidence trail produced as the system runs.

Cloud & GovCloud Architecture. FedRAMP-aligned landing zones in AWS GovCloud, Azure Government and commercial regions.

Custom Software Development. Applications, internal platforms and customer portals built for compliance-driven operations.

DIFFERENTIATORS

- Compliance documentation is engineered alongside the system, not assembled before an audit.
- Senior engineers stay through delivery — founder-led scoping, no handoff to a junior team.
- First workflow live in about 30 days; full engagements 8–14 weeks; CMMC remediation 4–9 months.
- We build to the control set and work alongside your assessor. We are not a CMMC RPO or C3PAO and do not perform assessments.
- Unclassified work only, including CUI handling under NIST 800-171 and CMMC Level 1–2.

INDUSTRIES SERVED

- Construction
- Healthcare & Life Sciences
- Finance — banks, credit unions, fintech, insurance
- Real Estate & Property Management
- US Federal, State & Local Government
- Defense Industrial Base — DoD primes and subcontractors

NAICS CODES

541511	Custom Computer Programming — bespoke software, mobile apps, AI agents
541512	Computer Systems Design — cloud architecture, BI/analytics
541519	Other Computer Services — AI/ML consulting, RAG engines

541611	Administrative & General Management Consulting — process design, operational assessment
541690	Scientific & Technical Consulting

TARGET CONTRACT VEHICLES

- GSA MAS 54151S / HACS 54151HACS (applied)
- CIO-SP4 SDVOSB Pool (NITAAC)
- OASIS+ SB / SDVOSB Pool
- AFWERX Open Topic SBIR
- VA Vets First — FL Veteran Preference

REGISTRATIONS

SAM.gov Active · SDVOSB / SBA Certification Pending · FL MFMP Registered · GSA MAS 54151S applied · GSA HACS applied

PAST PERFORMANCE

Representative engagements span construction, healthcare, finance, real estate and the defense industrial base — including Sage 300 and Procore integration across 40+ active projects, a HIPAA-aligned patient communication platform on Epic FHIR, FCRA tenant screening automation, and NIST 800-171 controls implementation for a DoD subcontractor pursuing CMMC Level 2. Written case studies are published at autom8ionlab.com/case-studies.

Many engagements are governed by non-disclosure agreements that prevent us from naming clients publicly. Additional past-performance detail and references are available on request after a qualifying conversation.
